To play again press the PLAY button or press the Space bar on your keyboard.

### **How to play**

Press PLAY and the symbols will fall into place on the 5x4 game board. If a winning pattern is revealed:

- Those symbols are destroyed

- New symbols fall from the top to fill the gaps created
- The multiplier meter moves up by 1 spot

If the new symbols that get added lead to a new winning pattern, the process continues until no winning patterns are present. Once no winning patterns are present, the multiplier is applied to the wins for that go and the total is awarded to the player.

## Winning patterns

Finding 3 or more identical symbols that share a horizontal or vertical face creates a winning pattern (diagonals do not count).

Only the highest prize won on each cluster will be paid.
